A.—IMPJETANT INFORMATION.

The Masonic Relief Association of Norfolk, Va., which proposed to distribute \$4.09 gifts at their concert on the 19th of November, was characted by the Legislature to the purpose of completing a Masonic Temple, and not for the benealt of individuals. Its President, John L. Roper, Esq., of the firm of Barrd & Roper; John L. Corprew, Esq., wholesale dry goods merchant; Colonel L. D. tiarke, attorney at law, and the other directors, who are some of the best clitrens of Norfolk, receive no pay for their services, tendering their ald gratuitously for this charitable cause. Its Advisory Board has on it ex-Governor Walker, Colonel Robert K. Withers, United States Senator elect; Colonel Walter H. Taylor, Hon. John R. Whitchead, Mayor of Norfolk; Colonel T. F. wen, Past Grand Master of Masons of the State of Virginia, an array of gentiemen of such character as to satisfy the most incredulous that the drawing will be conducted with honesty and fairness. We can assure all who desire to place themselves in a position whereby they may reap great gain and at the same time do good, that they can safely entrust their money to there gentlemen. A NEW IDEA IN FINE Courier, November, 1-1874.

A NEW IDEA IN FINE COURIER INDISTRIAL EX.

HISTION AND DRAWN-ERIE ENDISTRIAL EX.

The Rothschilds and other eminent European Banking houses have at different a measurement with a low rate of interest (on a well secured inestment) with a reasonable chance (through a well considered lottery drawing) at large capital prizes.

This clever idea, which has been so successful abread, has recently been introduced into this country, and is now the system upon which the Intestral Exhibition is being conducted. The system is very simple, and can readily be explained to the "comprehension of even the most superficial reader,"

Each bond of the Industrial Exhibition Company is secured by a mortgage upon the real estate held by the company, which is located in the most valuable portion of the metropolis. Each bond also pays certain rate of interest, somewhat smaller, of course, than the ordinary rate, but still sufficient in itself to be quite an object.

In addition to this each bond is considered as a ticket in of interest, somewhat smaller, of course, than the ordinal high real, but still sufficient in itself to be quite an object.

In addition to this each bond is considered as a ticket in a lottery drawing, which is entitled to a cortain chance at prizes varying from \$500 to \$100,000, so that a holder of these bonds not only its accurred in his investment and is certain of his interest, but has a fair chance at a fortune beauties.

Further than this, the Drawn-serie Bonds, which were drawn October 5 last, and which are to be redeemed December? next, increase the holder's chances for the drawing of a prize by diminishing the number of tickets in "the pool." There are only 4,000 of these drawn-serie bonds, whereas there are from \$0.000 to 100,000 tickets in the other lotteries now before the public—consequently the holder of oposities drawn-serie bonds has from seven to twenty-five times better chances offered him in the Industrial Exhibition than in any other scheme.

Again, the price of a frawn-serie bond is only \$19 (\$40 now and \$21 repair on the tist final rederuption). Now, this is from \$1 to \$31 less than the price of any other less money the holder of a drawn-serie bond receives a better the redence at a capital prize than by any other system now in practical operation.
